

Faisal

Mechanical Engineer

Hi! I'm Faisal and I love exploring different materials. I **collaborate** with others to make sensors to measure how materials are performing, e.g. is the material a bridge made of still strong or is it breaking down? I also design new materials with new characteristics, which requires me to be **agile** and **adaptable** to try different ideas to come up with the best solutions.

I learn from nature to design stronger and stickier materials
